

Social & Responsible AI Research
Cambridge, UK

Internship Positions

Summer 2026

Bell Labs Cambridge (UK) welcomes applications from outstanding, preferably final-year, PhD students. Internships last 3 months and run between early June and late August. Salary is competitive, and visa support is available.

Why Bell Labs

Interns will be supervised by researchers in the Social & Responsible AI team at Bell Labs Cambridge known for its strong publication culture. Projects are designed with publication in a top-tier venue in mind. Recent lab publications can be found at <https://social-dynamics.net/newsletter/2025/>

Main internship projects

1. Can AI Incorporate Human Morality?

Goal: Investigate how AI systems can model human moral judgments.

Skills: Survey Design, Crowdsourcing, Statistical Analysis, and Moral Choice Theory.

2. Co-creating a Taxonomy of AI Risks

Goal: Develop a grounded taxonomy of AI risks with diverse stakeholders.

Skills: Co-Design Methods, Survey Design, Statistical Analysis, and AI Ethics.

3. Participatory Auditing of AI Risks

Goal: Design and evaluate participatory methods for auditing AI systems.

Skills: Survey Design, Experimental Design, (Web)Development, and AI Ethics.

4. Visualization Tools for Decision-Making in Responsible AI

Goal: Create visualization tools that support responsible AI decision-making.

Skills: HCI/Info Viz, (Web)Development, and User Studies.

5. AI Risks, Opportunities, and Data Centers in the News

Goal: Analyze AI risks and benefits in news media at scale.

Skills: Large-Scale Data Analysis, Natural Language Processing, and AI Ethics.

6. AI Governance: An Organizational Perspective

Goal: Study how organizations govern AI using large-scale network methods.

Skills: Survey Design, Large-Scale Data Analysis, and Network Science.

Application material should include CV; one paragraph on how your research fits one project above; and a copy of a recent publication or an example of relevant work.

How to apply
